

Vitals for surveillance, without the queue.

The Abby Health Station is a self service health screening station. In about three minutes, with no needles, a person gets over 20 health results, including blood pressure, body fat and blood oxygen, and receives them on WhatsApp.

YOUR MEDICAL, IN ORDER

Abby does the vitals. Your clinic does the rest.

STEP 1 Abby station Vitals in about three minutes. The worker does it alone, before the consultation.	STEP 2 Your nurse Sees every flagged reading. Finger prick glucose and cholesterol are done by your nurse.	STEP 3 Your clinic's own tests Lung function, hearing, urine and X ray stay with the kit you use today.	STEP 4 Your practitioner Reviews the records and signs the certificate of fitness.	STEP 5 The record Every Abby station result saved digitally, ready for DMPR reporting.
---	--	---	--	--

The Abby station sits at the front of the medical. Nothing else moves.

Up to 20 workers an hour, per Abby station	3 min about three minutes per worker	1 tile of floor space. Fits through normal doors and lifts.	Since 2019 in mine and plant clinics

PRIVACY AND CONSENT

Who sees what.

1	The worker Every result and the next step, on WhatsApp, in most South African languages.
2	The appointed health practitioners Results by name, flagged readings first. Only they see names.
3	Your site and group managers Shares and trends in the site report. Never a name.

HOW IT STARTS

A call, a Show Day, then all year round.

1. A call We learn your clinic volumes and workflow, and check an Abby station fits.
2. A paid Show Day An Abby station at your site. It doubles as an in person demonstration.
3. Abby all year round One monthly service fee covers the station, software, integrations, your branding and a live dashboard.

A station usually makes sense when your clinic does about 420 or more vitals checks a month. Below that, event days are a better fit.

WHERE IT LIVES In South Africa Records sit in South African data centres, encrypted and access controlled.	CONSENT On the station screen Each worker agrees before the check starts.	YOUR RECORDS Export any day CSV, Excel or PDF, plus a live dashboard.	HOW IT CONNECTS Systems, API or export Leading occupational health systems and any system with an API.
--	---	---	--

Start with a call.

Then a paid Show Day at your site, then Abby in your clinic all year round.
